

AQUAEL

SAS 500 FILTER

EFFECTIVE WATER SURFACE FILTRATION

The **SAS 500 FILTER** is an aquarium surface filter designed to clean the water surface of the layer of contamination from dust, protein film or small plant residue. It helps maintain the aesthetic appearance of the aquarium and supports the water filtration and aeration process. Thanks to its adjustable capacity, it is ideal for aquaria with large and small water surface areas.

PARTICULARLY USEFUL:

- in open tanks
- after tank servicing
- in aquaria with a large number of fish

SAS 500 Filter

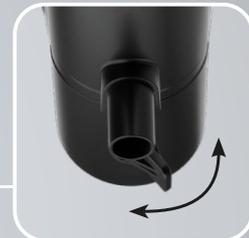

SPONGE PREFILTER
prevents shrimps and small fish from entering the motor compartment

MAINTENANCE-FREE FLOAT
the unit automatically adjusts to varying water levels in the tank

HOLDER WITH SUCTION CUPS
quick and easy installation

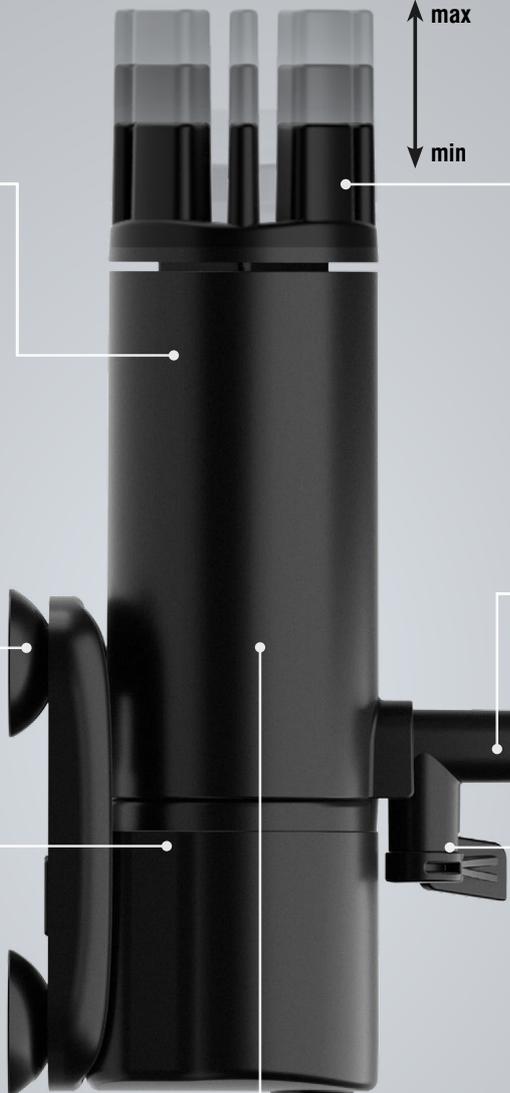

OUTFLOW DIRECTION ADJUSTMENT
wide range

ENERGY EFFICIENT PUMP
with low power means savings in daily running costs

ADJUSTABLE OUTPUT
the unit can be conveniently adapted to almost any type of aquarium

SIMPLE DESIGN
guarantees ease of cleaning and maintenance
