

TWINSTAR S LINE

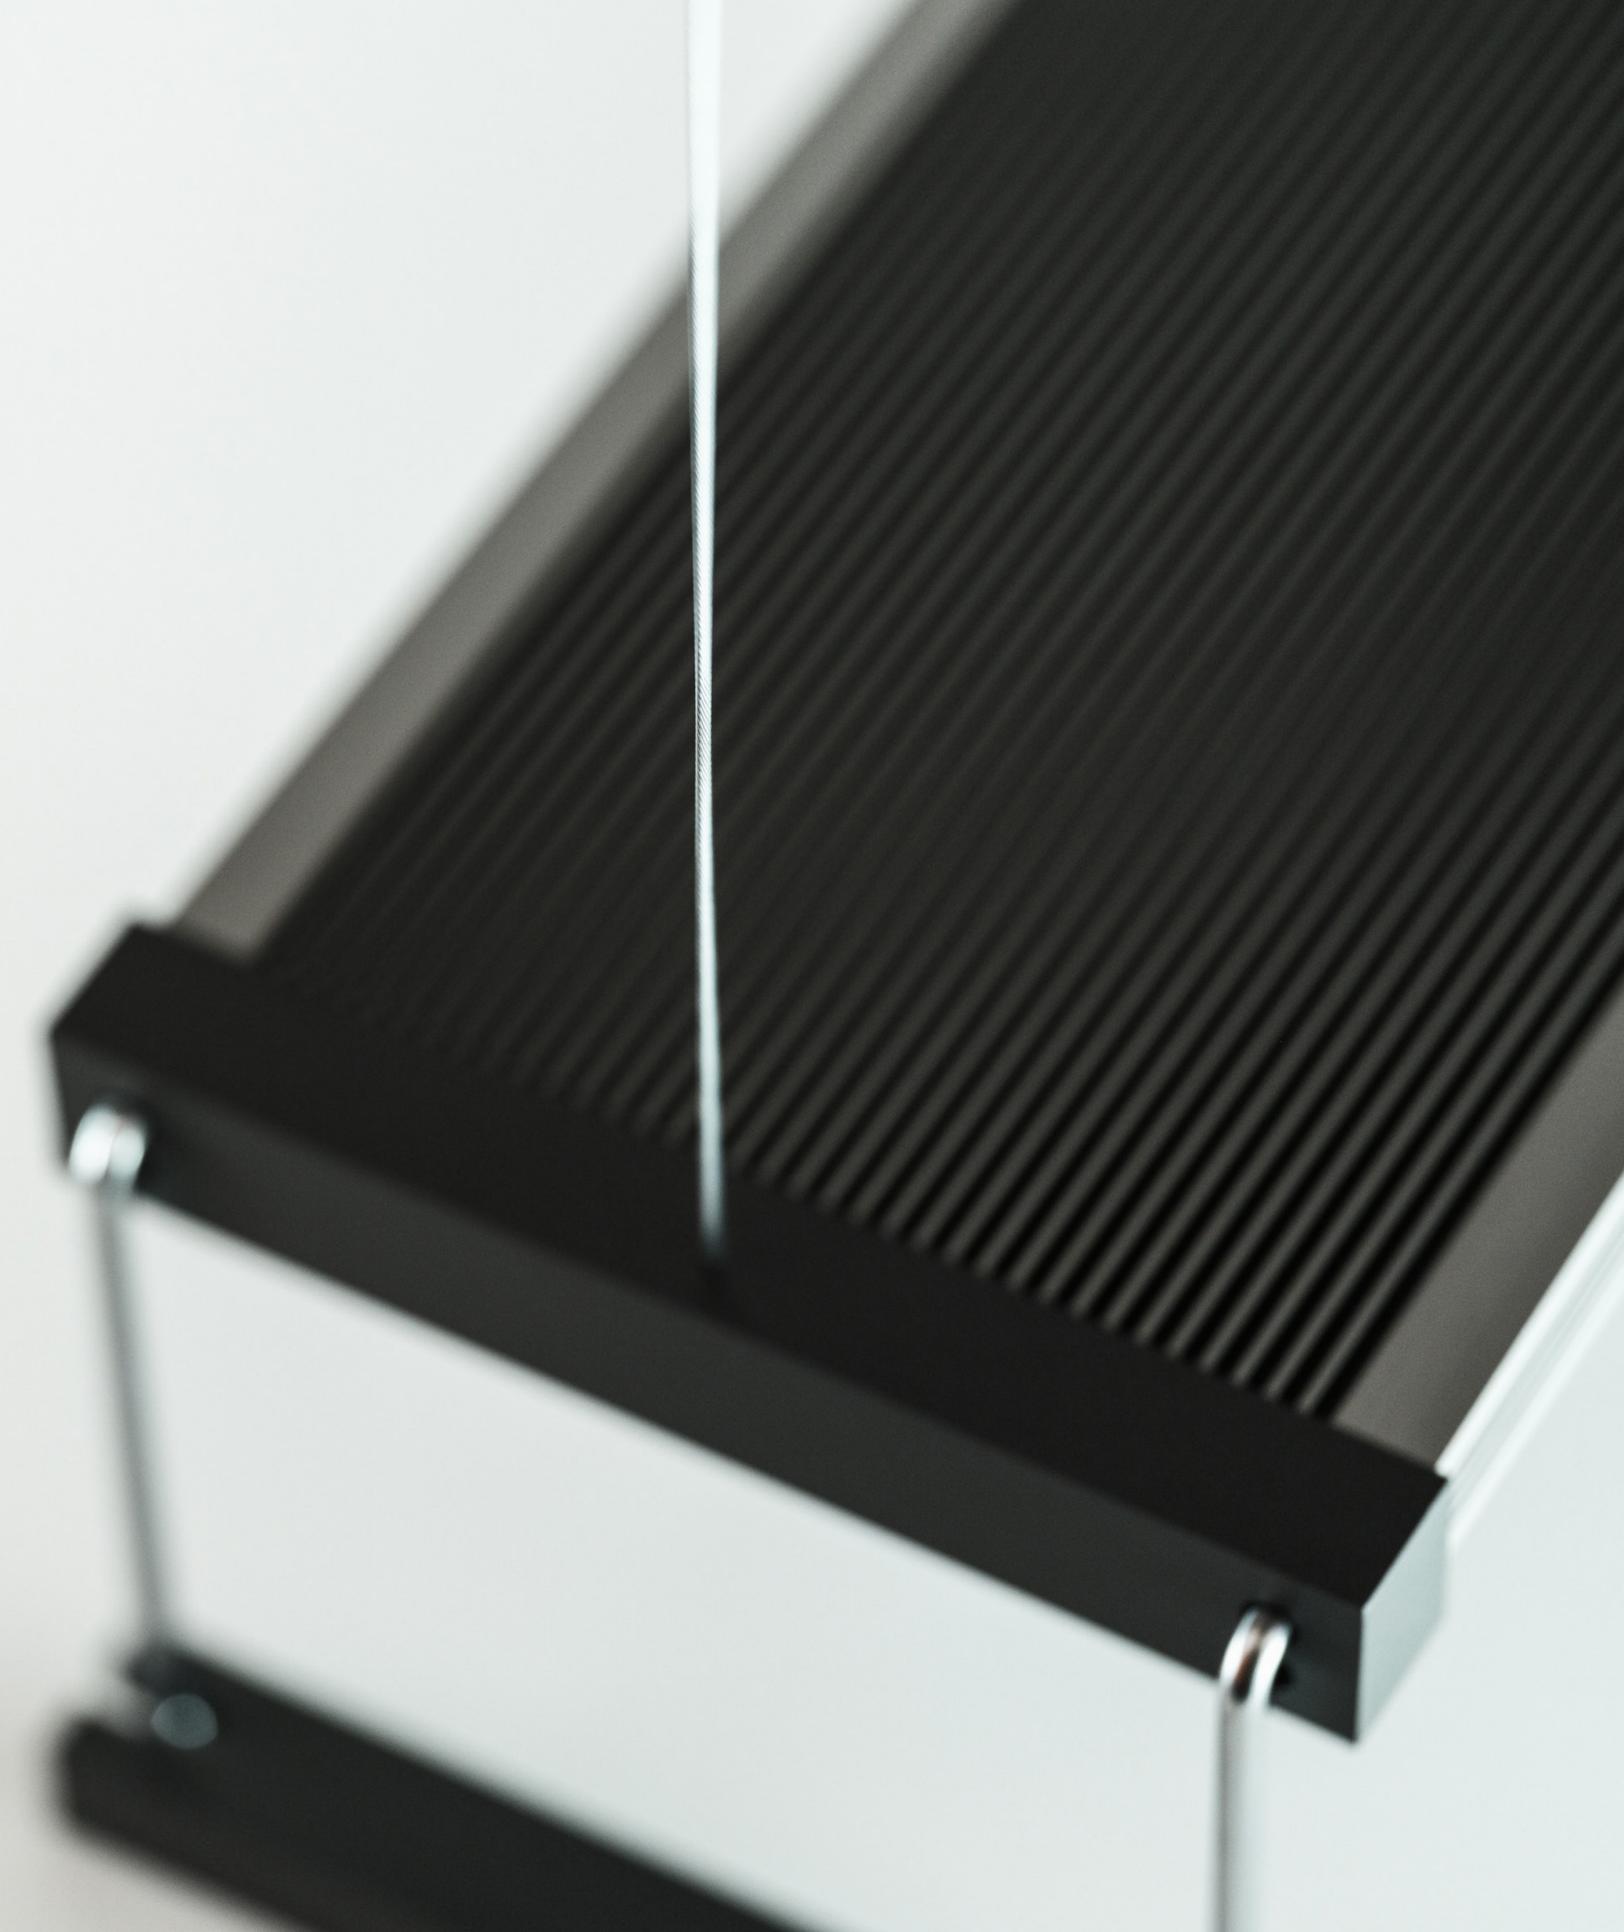

TWINSTAR S LINE

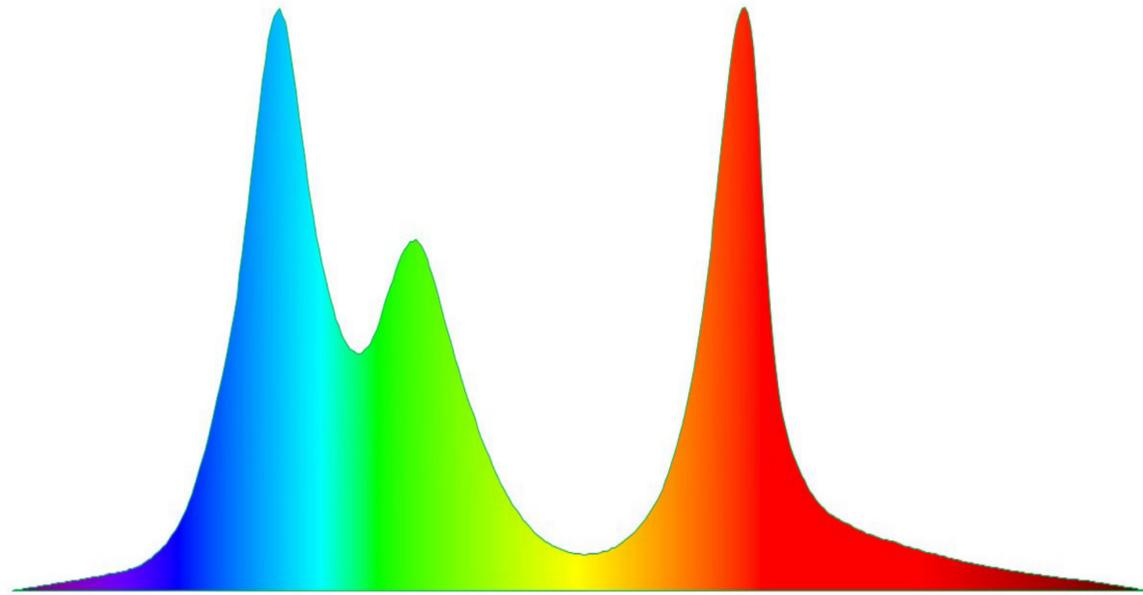

With innovative customized LED,
we provide the optimal growth conditions for plants.

TITANIUM
SA LINE COLOR

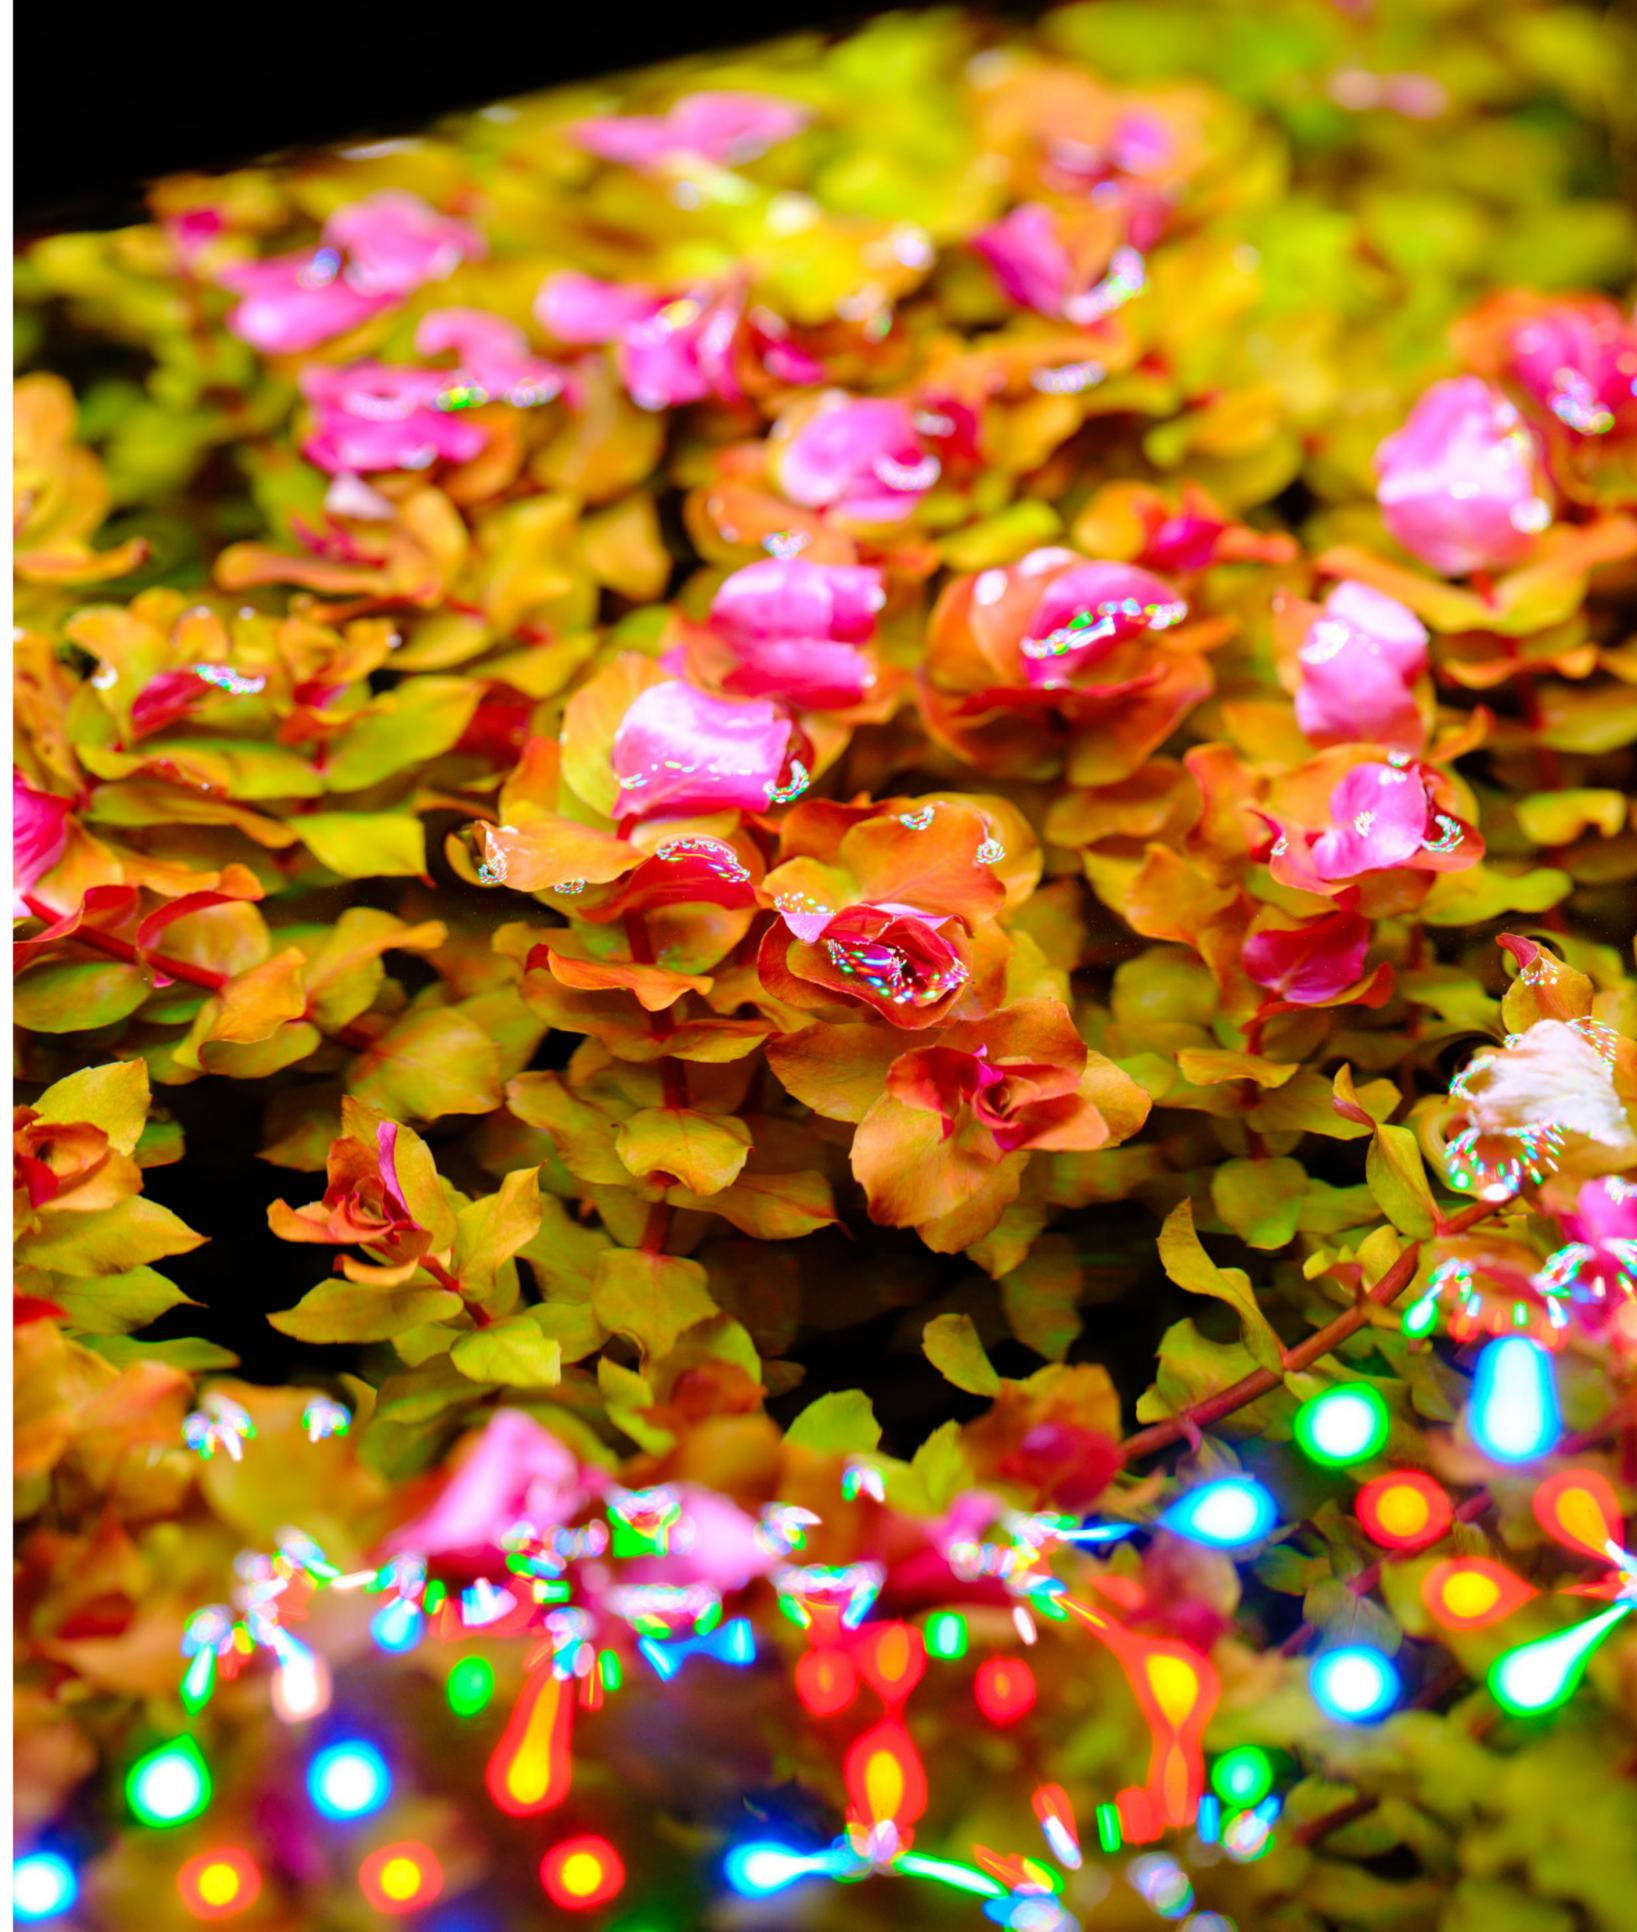

NEW DESIGN CONCEPT
It can be installed in two ways.

4G SPECTRUM

It's completely different from other plant lights. When you look at the chart, it covers all wavelengths. The wavelengths involved in plant growth and those enhancing vivid colors have been simultaneously improved. This is true full-spectrum lighting.

REAL FULL-SPECTRUM LIGHTING

It vividly showcases the colors of beautiful aquatic plants.

PHOTOSYNTHESIS

Upon installing the lighting, aquatic plants immediately respond to light and start photosynthesis.
This is the 4th generation spectrum technology.
